3DS01 - Onda

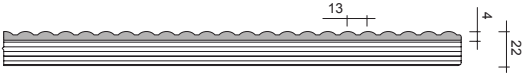

Anta spessore 22mm in massello di legno lavorato tridimensionalmente e placcato su multistrato di betulla. Una estetica classica che richiama il fascino esotico delle avanguardie del primo novecento, con un motivo decorativo semicircolare realizzato su massello di legno. Il pannello in multistrato di betulla garantisce incredibile resistenza e stabilità dimensionale, oltre ad essere certificato FSC® (gestione responsabile delle aree forestali) e CARB-P2 (tra i più stringenti standard al mondo per le emissioni di formaldeide). L'anta è placcata esternamente con massello da 4mm con lavorazione tridimensionale ed internamente con piallaccio della stessa essenza. I bordi sono in multistrato a vista, che accompagna il motivo decorativo con la caratteristica rigatura delle fibre incrociate con cui è realizzato il pannello.

- +
- Essenza di legno naturale
- Decorazione ad alto spessore
- Pannello proveniente da foreste responsabili
- Oltre 10 finiture

Door with a thickness of 22 mm plated with a three-dimensional solid wood layer applied on birch plywood. A classic aesthetic reminiscent of the exotic charm of the early 20th century avant-garde, with a semi-circular decorative motif on solid wood. The birch plywood panel guarantees incredible strength and dimensional stability, and is also certified FSC® (responsible forest management) and CARB-P2 (one of the most restrictive standards in the world for formaldehyde emissions). The door is externally plated with 4 mm thick solid wood with three-dimensional processing and internally with the veneer of the same wood. The plywood visible on the edges matches the decorative motif with the characteristic striping of the crossed fibres from which the panel is made.

- +
- Natural wood veneer
- High thickness decoration
- Panel sourced from responsible forests
- Over 10 finishes

3DS02 - Quadra

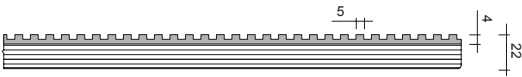

Anta spessore 22mm in massello di legno lavorato tridimensionalmente e placcato su multistrato di betulla. Una estetica che richiama l'intramontabile rigore classico, con un motivo decorativo a sezione quadrata realizzato su massello di legno. Il pannello in multistrato di betulla garantisce incredibile resistenza e stabilità dimensionale, oltre ad essere certificato FSC® (gestione responsabile delle aree forestali) e CARB-P2 (tra i più stringenti standard al mondo per le emissioni di formaldeide). L'anta è placcata esternamente con massello da 4mm con lavorazione tridimensionale ed internamente con piallaccio della stessa essenza. I bordi sono in multistrato a vista, che accompagna il motivo decorativo con la caratteristica rigatura delle fibre incrociate con cui è realizzato il pannello.

3DS03 - Regula

Anta spessore 22mm in fibre di legno a media densità (MDF) specifico per fresature e lavorazioni tridimensionali. Una estetica razionale e moderna con un ritmo regolare del pentagramma decorativo, personalizzabile con tutte le nuance di laccatura opaca o metallica. Il pannello presenta eccellenti prestazioni meccaniche e soddisfa i criteri ambientali CARB-P2, tra i più stringenti standard al mondo per le emissioni di formaldeide.

Door with a thickness of 22 mm in high-density wood fibreboard (MDF) made specifically for milling and three-dimensional processing. A rational and modern design with a regular decorative pattern, customisable with all nuances of matt or metallic lacquer. The panel has excellent mechanical performances and complies with the CARB-P2 environmental criteria, one of the most restrictive standards in the world for formaldehyde emissions.

3DS03 - Varia

Anta spessore 22mm in fibre di legno a media densità (MDF) specifico per fresature e lavorazioni tridimensionali. La decorazione evoca una rottura del pentagramma compositivo e si ispira ai linguaggi progettuali postmoderni, personalizzabile con tutte le nuance di laccatura opaca o metallica. Il pannello presenta eccellenti prestazioni meccaniche e soddisfa i criteri ambientali CARB-P2, tra i più stringenti standard al mondo per le emissioni di formaldeide.

Door with a thickness of 22 mm in high-density wood fibreboard (MDF) made specifically for milling and three-dimensional processing. The decoration recalls a disruption of the pattern and is inspired by postmodern design languages, customisable with all nuances of matt or metallic lacquer. The panel has excellent mechanical performances and complies with the CARB-P2 environmental criteria, one of the most restrictive standards in the world for formaldehyde emissions.
